The DNP DS40, DS80, and RX1 driver will provide printing functionality similar to the Microsoft printer driver.
The following OS versions and processor architectures are supported:

Mac OS 10.8 (Mountain Lion)

Mac OS 10.7 (Lion)

All executable modules should be 64-bit Intel binaries & support

 Intel 64-bit processor architecture (x86_64)

Note

i386 is not supported by Mac OS 10.7+. Some binaries may still be 32/64 bit to provide a single binary with fixes for 10.6 and above.

Mac OS 10.6.8 (Snow Leopard)

All executable modules should be 32/64-bit Intel binaries & support

 Intel 32-bit processor architecture (i386)

 Intel 64-bit processor architecture (x86_64)

Purpose

This document includes instructions for installing the printer drivers for DS40/DS80/RX1 printers on Mac OS X.

Attention

Before You Begin:

If the printer is connected to your computer, make sure it is turned OFF.

Go to **System Preferences > Print & Scan**. If a DNP series printer is listed, delete it.

1. Double click the **DNPOSXDrivers.dmg** to mount the virtual drive.

DNPOSXDrivers.dmg

2. A DNP Drivers icon/drive will appear on the desktop. Double-click the drive icon.

DNP Drivers

3. A window will open. Double-click the **DNP Photo Printer Installer.pkg** file.

- 5 The installer will begin. Click **Continue**.

6. Read the important information on the following screen. When you are done, click **Continue**.

7. Read the License Agreement on the following screen. When you are done, click **Continue**.

8. You will be prompted to accept the license agreement terms. Click **Agree**.

9. In the next window, click **Install**.

10. If your Mac operating system is password protected, enter your password when prompted. Click **OK**.

11. The installation will begin.

12. When the installation is complete you will receive the message “The Installation was successful.” Click **Close**.

You have now installed the DS Printer Drivers on a Mac operating system.

TURNING ON THE PRINTER

1. If the printer is not already plugged into the USB port, do so now.
2. Turn the printer ON.
3. The printer should be added as a device automatically in about 1 minute.

Attention

Do NOT use the + sign to add the printer. In this case, you may have another instance of the DS Series printer in the printer list.

Troubleshooting:

Make sure the printer is connected to the USB port and turned ON. The LEDs on the printer should indicate a “Ready” status. (For more information on this, consult the DS Printer User Manual.)

If the printer is added, but you cannot print:

1. Turn the printer OFF. Go to **System Preferences > Print & Scan** and delete any DS Printers listed.
2. Turn the printer ON and wait for the printer to add itself as a device again.

If the printer does not automatically add itself to the printer list, use the + sign to add it in the **System Preferences > Print & Scan** dialog box.
